

Orientation of the school children for environment & ecology:

Orientation training was held on World Environment Day, 5th June 2014 among the School Students with the topic Environment & Ecology. The speakers addressed the students on the necessity of Tree Plantation for restoration of earth and protecting environment and nature. The object is not only concerned about the environment and plantation, we are trying to teach the students and the youth how to love the environment and trees and how to behave with them. We encourage them for joining us with our plantation and environment programme.

Topics	Expense s	No. of Camps	No. of Participants		
			Female (average)	Male (average)	Children/ Boys/Girls (average)
Orientation of the school children for environment & ecology	25,200/-	4	--	--	612

Workshop on Global warming:

We have conducted awareness on Global Warming and Climate change with the aim

to stop global warming where the participants are aware of the social, political and economic consequences that climate change may have on huge parts of the mankind. Global climate change impacts on human and natural systems are predicted to be severe. As evidence of climate change and its impact continues to be amassed, it has become clear that many of the causes of climate change are

anthropogenic in nature through lifestyles, consumption and choices that pollute and exploit resources in an unsustainable manner.
